Okanagan Valley College of Massage Therapy
#200-3400 30th Avenue
Vernon, BC V1T

Course Overview

This course is designed to be use on it's own or flowing the Facia Integration -1 course. Treatment of joints of the extremities will be covered in course one. Ankle, foot, knee, hip, shoulder, elbow and wrists mobilizations will be covered. Use of oscillation, and sustained mobilizations will be covered. Grade 1-4 levels of mobilization and oscillation will be explained, taught and used in treatment. Along with the methodology of fascial integration 1 participants will be able to determine when fascial techniques and when mobilization techniques should be used on a patient. Used on its own participants will learn when to use mobilizations during a Massage therapy treatment to improve patients movement, range of motion and reduction of pain.

Course Outline

Day 1– Joint mobilization and oscillations (Grade 1-4) review anatomy, and assessment for upper body

Day 2 - Comparing and contrasting bone based joint concerns requiring or prohibiting joint mobilizations explored using case scenarios. Participants will develop treatment plans addressing client concerns while integrating priority sequencing for effective and safe massage treatments.

Day 3 – Practical treatment. Technique variations for full body application through linen and direct contact with skin.

Brad McCutcheon has 20 years experience in teaching Massage Therapy and Osteopathy and 25 years of clinical practice.
