Email: [info@ovcmt.com](mailto:info@ovcmt.com)

### *Location*

Okanagan Valley College of Massage Therapy

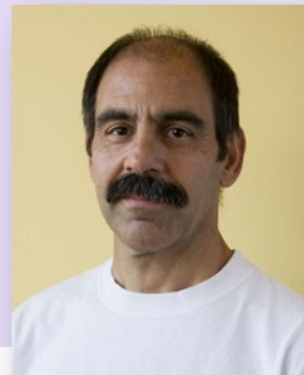

#200-3400 30th Avenue

Vernon, BC V1T 2E2

The lumbosacral & pelvis workshop builds on the skills developed in the Extremities workshop. From a "fascial perspective" we want to understand how instability of the pelvis relates to instabilities in the lower extremities.

Using a 3 dimensional approach, the pelvis will be observed / assessed and corrected. This will involve focus on the Thoracolumbar Fascia and the Abdominal Aponeurosis. Participants will also observe the interrelationships between the lumbar spine, the sacrum and the pelvis .

A review of the regional anatomy and the fascial relationships to the internal and external structures will also be presented.

**NATALE RAO, RMT**

Natale's easy manner, exceptional knowledge in anatomy, his intuitive nature and exceptional

teaching skills make him a sought after teacher and therapist. For more information on the series go to [www.natalerao.com](http://www.natalerao.com)
