Vernon, BC V1T 2E2

Workshop Overview

This is **NOT** a craniosacral workshop. During this class, you will learn how to work with bones, meninges, brain, ventricles, arteries and veins of the cranium without even once palpating cranial rhythm. If you have always wanted to work with the cranium but felt intimidated because you can't feel cranial rhythm reliably, this course is for you!

You will learn to:

Palpate and assess all tissues in the cranium;

Recognize patterns of restriction that can be effecting the CNS (Central Nervous System);

Safely restore normal or improved function to the CNS;

Extend your career by learning a gentle, non-invasive approach.

Come and improve the function of your own CNS, and learn how to support your patients in enjoying a healthy brain in a healthy body.

Sheryl Hamilton has been an RMT for 20 years, and has taught massage therapy and related sciences in New York, NY and Vernon, BC for almost 10 years. She brings a deep understanding of living human anatomy and a curiosity and fascination about the healing process and how best to facilitate it.
